# **Corn Raisers**

In this day of progressive farming, it has become absolutely necessary to secure the largest possible returns from the land, and as corn has become the most important and valuable crop, special attention should be given to the selections of both the seed and the planter. We believe that in selling you the John Deere "Oblique Selection" two-horse corn planter, we are giving you the very best planter on the market today. "Oblique Selection" the name given this perfected seed dropping device which repeated tests show is as far ahead of the old edge drop as the edge drop was ahead of the round hole plate. It takes its name from the fact that the surface of the hopper bottom and the openings for the seed cells are oblique or sloping. With the old edge drop, the kernels had to be tipped on edge before they could enter the cells at all. The weight of the corn in the hopper interfered with this action-consequently cut down the accuracy. The John Deere Planter overcomes all these old fashioned troubles, and we would like you to come in during this week's Opening Demonstrations and hear about it and see the machine. There's an expert here who can answer all your questions.

The bride-to-be flushed furiously as she recalled that talk. Then she nodded in a matter-of-fact manner. "I remember very well," she said. "It was when I threw myself at your head and you said you didn't want me."

Francois' shoulders and hands and eves went upward together into an eminently French gesture. "What a horror!" he cried. "What an unspeakable manner to recollect that talk! How can you? How can you be so brutal to me?"

Both of them, at that, burst into light-hearted laughter. Lucy was grave suddenly.

"But you have something to ask me, Francois. You spoke of yourplaymate-beautiful Alixe."

"It is only you whom I could ask to do this. Mademoiselle Lucy. I have meyer told anyone else about her. Only you know of"-the words came slowly-"of my love for her. She does not know it. Alixe does not know. And I may be killed, one sees, in this fight for the prince. Quite easily. And Alixe will not know. I do not like that. In fact I cannot bear it. So this is what I ask of you, dear mademoiselle." He brought out a letter and held it to her. "If you hear that I am killed, will you send it to Alixe?"

Lucy took the letter and turned it over doubtfully. "I' do not like this sort of post-mortem commission, Francois. I feel as if I were holding your death-warrant."

"But it is not by a bit of writing ! shall meet my finish, mademoiselle. promise not to die one minute sooner for that letter. It is only that it will make me happy to know you will send "t."

So Lucy, holding the letter gingerly agreed. But as Francois rose to go she stood by him a moment and laid her hand on his coat sleeve. "Francois-I want to tell you something."

"But yes, mademoiselle-yes, Lucy." "It is something wrong."

"Yes-Lucy." "I am going to tell Harry I said it." "Yes."

"This is it, then"-and Francois smiling, waited and there was deep silence in the big, cool, quiet drawing room for as long as a minute. "This is it, then. I don't know how I can be so unreasonable but I am. I love Harry -I am happy. But I am quite-jealous of Alixe. And I think you are the most wonderful person I have ever known -much more wonderful than Harry. If there had been no Alixe; if you had -liked me I can imagine having adored you. I do adore you, Francois. Now, how is all that compatible with my joy in marrying Harry? I don't thick locks-after the manner of the the horses stamping in the paved haps he secretly loved me but would know how it is but it is so. I am a curls of Praxiteles' Hermes-was courtyard and the grooms singing, and not say it because he was poor and a wicked sinful person-but it is so."

The next time Lucy Hampton saw Francois it was when, white-robed and erybody getting old? ## CHAPTER XXX.

The Third Wish.

On the day when Francois in London read that letter of Lucy Hampton's which had awaited his return from France, a letter from Lucy Hampton reached Alixe at the chateau of Vicques. She carried it to Pietro's room where he sat in a deep chair at a but when you put your hand on window which looked over Delesmontes valley and the racing Cheulte river, and the village strung on the shores. His elbow on the stone win dow-sill, his chin in his hand, he stared at the familiar picture.

He rose, this night in Boulogne, as the paper rustled and the little French provincial chanson sounded from the room where Francois Beaupre, now stepped to the closed door.

"De tous cote's l'on que je suis bete." Francois sang softly. The Prince

smiled. As he opened the door the singing stopped; the young man sprang respectfully to his feet, a letter grasped in his hand, and stood waiting.

"Sire!" he said.

Prince Louis flung out his hand with a gesture of impulsiveness strange to his controlled manner, yet not out of drawing to those who knew him well. 'Ah, Francois," he cried. "Let the titles go for tonight. Say, 'Louis,' as ing back to the same subject, "you on that day when we first saw each other; when the four children played together in the old chateau ruins. And Francois smiled his radiant exquisite smile and answered quietly. "But yes. my brother-Louis." And went on, "I believe I shall not sleep tonight, Louis.

I believe I am too happy to sleep." As one reads a novel for relaxation in the strain of a critical business affair, Prince Louis caught at the distraction of this side issue. The next morning was planned to the last detail; there was nothing to do till daylight, yet he could not sleep at present. Here was a romance of some sort. He sank back on the cushions of the coach of Lieutenant Aladenize's smoking room and put his feet up luxuriously, and slowly lighted a cigar of Havana.

"Tell me," he ordered, and the gen tleness of appeal was in the order, "Sire"—the young man began—and

corrected himself. "Louis," he said. The Prince smiled dimly. "Since our landing I have known that a wonderful thing has happened to me. It is"he spoke lower-"it is the love of the woman who is to me the only one in the world."

"I congratulate you, mon ami," Louis said gently. "Is it by any chance the delightful little Mademoiselle Alixe of the old chateau?"

Beaupre turned scarlet. He was a marvelous man, this Prince Louis, How had he guessed? "She loves me -I have here a letter in which she tells me that she loves me. Will his Highness read it?" With an impetuous step forward he held the paper toward Louis Napoleon. "I thank you," the Prince said grave-

The Prince gave back the letter with a respectful hand; then looked at Francois inquiringly. "'What you have wished all your life,' mon ami?" Francois laughed happily. "One must explain, if it will not tire his Highness." And he told, in a few worde, of that day when his self-restraint had | W.F.YOUNG. P. D. And how, meshed in that same net of hurt recklessness, he had answered in her own manner-"Yes," he had said. "it was that which had been the wish of his life-that Alixe might love Pietro!" And Francois laughed gaily, telling the simple entanglement to the Prince, the night before the battle. "One sees how she is quick and clear-sighted, my Alixe," he said. "For she knew well even then it was not that I wished." He stopped, for in the quiet contained look of the listener an intangible something struck a chill to his delicately-poised sensitiveness. "What is it, Louis?" he cried out. "You do not think I mistake her -mistake-Alixe!"

ART OF TREE SCULPTURE | number used each year or where they Old English Custom That Called for

the Cutting of Fantastic Shapes.

Very many years ago it was the fashion of England and on the continent to have great gardens of evergreen trees trimmed and clipped into curious and fantastic shapes. To such an extent did the craze develop that these gardens were filled with crouching lions, pigs and even hens and chickens, all laboriously sculptured from living green and kept in trim by constant use of the knife and the shears.

A few of these gardens were established in this country and one still remains in perfect condition. It is located on the famous Hunnewell estate at Wellesley, Mass., and is visited by people from all over the world. The garden is on the side of terraced hill dropping away to a beautiful little lake.

Evergreens of many kinds are to be found there and each summer a force of workmen with long ladders carefully prune and trim the branches in order to preserve the strange shapes which have been developed with the utmost patience.-Popular Electricity.

of this wood was greatly diminished and its price raised, so that for a time cigar dealers were obliged to find a substitute for this kind of cedar.

Various woods were tried, but trouble was found in selling these boxes, because connoisseurs insisted that a fine cigar was spoiled by putting it in any but a box made of Spanish cedar. This wood always retains the flavor of a good cigar. Indeed, some persons assert that it improves the flavor. The reason given is that it grows in the same localities.

THE JOURNEY TO EMMAUS.

(Easter Lesson.) LESSON TEXT-Luke 24:13-25.
GOLDEN TEXT-"Who is he that shall condemn? It is Christ Jesus that died, yea rather, that was raised from the dead, who is at the right hand of God, who also maketh intercession for us.

We turn asige today to consider as the Easter lesson a well-known event in connection with the several appearances of our Lord after his resurrection; one of the many infallible proofs, Acts 1:3; I Cor. 15:4. The narrative of this journey is one of the most beautiful post-resurrection stories, simple, clear and of great value. It is related, evidently, by an eye witness. The Cleopas mentioned is not the son of Mary, John 19:25. The name of the second pilgrim is but a conjecture, though we somehow feel It was Luke himself. The journey was about seven and one-half miles and most fikely they were returning to their homes after the Passover. Somewhere on the way a stranger joined them who asked the nature of their conversation, and the cause of their evident sadness (v. 17). In astonishment, Cleopas answers, but the stranger continues and adroitly draws out their entire story.

## Interesting Progression.

1. Their Disappointment, vv. 13-24. It is all too evident that they did not expect a resurrection and that, filled with perplexity and discouragement they were on the verge of despair. It is interesting in this lesson to observe

"Get in. and, moreover that their statement of an empty tomb had by certain women who had gone to in vestigate, but, in conclusion, they again reverted to their sadness by saying "They found his body" and moreover, "Him they saw not." Such mystery, such disappointment was too great. Still there was a trace of faith remaining in that he was still to them "a prophet mighty in word and deed," but he was not Christ the son of the living God. The trouble was they were expecting a man (v. 21), and to remove the man meant to remove all hope. His death was a mystery and not necessarily a part of the work of redemption and thereby a proof of his being the Redeemer of

his words (v. 21), yet three days are

now past and still they had not seen

him. The report of the women was

to them only an "idle tale (Luke

24:11), still it was incomprehensible

II. His Appointment, vv. 25-35. Evidently the journey was continued and he gently rebukes them for their slowness of heart to believe the record of their own prophets. All sadness, practically, arises from unbelief in the Word of God, Phil. 4:6, 7; Rom. 8:28-32. He interpreted to them the true Messianic teaching of their own scriptures. He charges them with folly not to believe "all" of the record (v. 25). True wisdom is not that of skepticism which cuts out portions of the word, but, according to Jesus, it consists in believing all of the Scriptures. At last they reach Emmaus, still, let us remember, not knowing who it is walking with them. The road beyond was dangerous and "they constrained him" to accept their hospitality. As he sat at the table partaking of the ordinary evening meal, he assumed the place of the host, took the bread, blessed it and broke it. Instantly those old familiar acts and words revealed to them who it was that had walked by the way. In that moment they knew him, and immediately he vanished. As one awakening from a dream they seem to good grocers. Adv. have had a vague realization and to going to authorize Mrs. Waddums to have known nothing of any fear, but now with a new gladness in their hearts at the verity and reality of things they hastened back to Jerusalem where "they told what things were done in the way and how he was known of them in breaking of III. bread," v. 35. tive is so full of teaching and yet so clear and simple that it is hard to suggest any ordinary deductions therefrom. The story does, however, reveal the interest of the risen Lord in the doubt of these two disciples. That they were probably not of the twelve is evident by the fact that when they returned to Jerusalem they found the eleven assembled (v. 33). Thus we see him going to those outside of that inner circle, also, two who loved him seeking a solution of the mystery and consolation for their sad hearts. First hiding his identity, he drew from them their story. He then took them back to their Scriptures, with which they must have been familiar, and revealed to them that this mystery was according to these holy writings.

# Uric Acid is Slow Poison

tect in its early stages, and cruelly painful in its later forms, uric acid poisoning is a disease too often fatal. Bright's disease is one of the final stages of uric acid poisoning. It kills in our country every year more men and women than any other ailment except two—consumption and pneumonia. Bright's disease and uric acid poisoning usually start in some kidney weakness that would not be hard to cure, if discovered early, so it is well to know the early signs of kidney dis-

ease and uric poisoning. When uric acid is formed too fast and the kidneys are weakened by a cold, or fever, by overwork, or by over-indulgences, the acid collects, the blood gets impure and heavy, there is headache, dizziness, heart palpitation, and a dull, heavy-headed, drowsy feeling with disturbances of the urine.

Real torture begins when the uric acid forms into gravel or stone in the kidney, or crystallizes into jagged bits in the muscles, joints or on the nerve tubings. Then follow the awful pains of neuralgia, rheumatism, gout, sciatica, neuritis, lumbago or kidney colic.

Mrs. Eliza Kirk, Main St., Spencer, Ind. says: "When my back began to get lame, I didn't pay much attention to the trouble and as the result, I got worse. If I made a sudden move, the pain in my back was like a knife thrust. The next symptoms were disziness, languor and a worn-out feeling. I went to the doctor, but his medicife didn't help me. I began to have terrible nervous spells and in three months, I was a physical wreck. My limbs and hands became useless from rheumatic pains and I had to be fed, dressed and helped at every turn. My limbs swelled and I would rather be dend than go through that suffering again. All that time. I was in bed and opiates were my only relief. The kidney secretions were in awful shape. When I had almost given up hope, I began using Doan's Kidney Pills and free over seven years I have remained cured."

HIS MIND ON HIGHER THINGS

Scholar Unable to Sit Down and Reason Quietly on Matters of Everyday Life.

A monument was recently unveiled to the memory of Henri Poincaire, the famous mathematician and physicist, who was a cousin of the president of France. The occasion recalls a story or two of his remarkable absent-mind-

Almost every day Poincaire left his money lying about somewhere. Finally his mother sewed his purse into the pocket of his coat. But one day, when he had dressed in a hotel, he put on his overcoat without the coat, and left that lying on a chair. Needless to say, he never saw the purse

again. One evening he was looking in a closed bookcase for a manuscript. During the search he set the lamp on a shelf in the case, and in a moment of abstraction closed the door of the cabinet, and sat down in darkness. After he had pondered for a time on the disappearance of the light, he came to the conclusion that he had suddenly become blind. That seemed to him quite possible, since his eyes were weak, anyway, and he groaned at the thought of his deplorable condition. Suddenly, to his surprise, a stream of light appeared coming from the adjoining room and he remarked, with much satisfaction: "My sight seems to have come back again." Not even then did he think of the lamp in the bookcase!-Youth's Companion.

## Water for St. Petersburg.

The city council of St. Petersburg is considering a measure appropriating \$25,000,000 for a supply of pure water, to be drawn from Lake Ladoga, 40 miles away. On reaching the Ladoga pumping station the water will be driven into reservoirs and filters. whence it will flow through the pipes unaided to the capital and there distributed. The capacity of the works, which will be ready in 1920, is calculated for a population of 4.500,000.

## DRY SCALE COVERED HEAD

2760 Tamm Ave., St. Louis, Mo .-'My little daughter's head began with a dry harsh scale covering it. First it got a white scale over the top and then it got a dirty brown scab with pus under it. Her hair came out in less than a week and her head itched and bled. She had no rest. I had her wear a scarf all the time, it looked so badly. She was so sore and had such big brown scabs on her head that the teacher would not let her attend

"We took and had her treated for three months with no relief. She kept getting worse until I tried Cuticura 30ap and Ointment. I used the Cuticura Soap every third day and the Cuticura Ointment at night. In three weeks her head was well of sores. Two cakes of Cuticura Soap and one box of Cuticura Ointment completely cured her." (Signed) Mrs. Walter Rogers, Nov. 28, 1912.

Pennsylvania's coal production is almost as great as that of the other twenty-seven producing States. "Mrs. Pankhurst," says an admirer, "is ahead of her time. She was born too soon." That depends. Mrs. P. could have made quite a hit in the French Revolution .- Charleston News and Courier.

### HERE Y'ARE, WHY YOUNG MEN ADMIRE THE GIRLS.

Prof. Theodore W. Richards, of Cincinnati, president of the American Chemical Society, meeting at Cincinnati, has discovered why young men admire young women. The difference between her and a chemical laboratory is what causes the admiration, he says. Girls are mostly chemical laboratories, he avers. Her smiles and even the debutante slouch are only results of chemical reaction.

## LOOKS LIKE COMMON SENSE.

The Colorado courts have been wrestling with the problem of what constitutes the gross proceeds of ore, which is one of the elements entering into the valuation of mines for the purposes of taxation under the law of that State. The question resolved itself into this: (1) Are the gross proceeds of an ore what the miner realizes at his place of production; (2) or what he realizes after he has delivered it to the smelter's works. The Supreme Court of Colorado, after pronouncing in favor of the latter construction, has reversed itself and adopted the former, which looks to us like common sense.

### THE KENTUCKY BLACKBERRY.

Commissioner Newman, of the State Department of Agriculture, Labor and Statistics, recently made the prediction that Kentucky would some day be famous as a producer of blackberries. "No place in 'the world," he said, "grows blackberries like Kentucky."

The blackberries is indigenous to Kentucky soil. Probably there is no place where it grows in greater profusion. The plants spring up in unexpected places and they multiply rapidly. The native blackberry grows anywhere and everywhere, and is marvelously prolific. On this account not much attention has been paid to its cultivation, though it responds handsomely to careful tending.

It would be impossible to produce better blackberries, so far as quality and general utility are concerned, than can be grown in Kentucky. It may be that there are localities where bigger berries are produced, but certainly there is no place where better ones are grown. In this respect the situation is the same as with regard to strawberries. The simple truth is that Kentucky is a great berry, State, but its greatness lies more in its prospects than in its achievements. Kentucky strawberries invariably find ready sale in the big city markets, and blackberries, if they were grown as a commercial proposition, quite as readily would find favor.

Really the Kentucky blackberry has never had a fair show. It is the most common of all the small fruits and berries. It has been aptly called "the poor man's fruit," and because of its very abundance it has not received the consideration that it deserved. It is the one luxury in the fruit line that has been in reach of the masses, growing in the fields, in the woods, in the fence corners, along the streams, on the hills and in the valleys-in some localities almost as omnipresent as grass itself. The presence of the plant has been so general that it is often regarded as a pest and "brier-cutting" is a part of the yearly agricultural performance in many sections of the State.

If the blackberry were a rare fruit its price would be above rubies or diamonds in the mine. Here in Kentucky where the crop is as certain as death and taxes, it sometimes finds a slow sale in the village markets at ten cents a bucketful. Kentucky ought to develop the blackberry and make money and fame out of it .- Courier-Journal.

Tangoing helps the farmer, says the Charlotte (N. C.) Observer, and proceeds to prove it as follows: "These new dances call for a vast increase in phonograph records; phonograph records are made out of a composition into which denatured alcohol largely enters, and denatured alcohol is strictly a farm product made out of potatoes and other farm waste." By the same process of reasoning, we might say that the tango will boom the turpentine industry in North Carolina, for tangoing makes the muscles sore, sore muscles drive the tangoists to a liniment rub, and most of the popular liniments contain a certain percentage of turpentine.-Louisville Times.

## THE SHREWD ADVERTISER.

Advertising! The thoughtful man thinks ahead. The prudent man profits by his ability to forecast the future as well as to scrutinize the present. One of the most prominent advertisers in the country says he makes it a rule to increase his advertising appropriation whenever business slackens, and he doubles and trebles it in times of severe business depression. This is his logical conclusion: "The new customers that I get when times are hard I always keep when times become good. They come to me largely from those who lose them because they fail to continue their publicity campaigns. A business depression in this country never lasts long, and it is always seed time for me. The harvest follows when prosperity returns." It is a wise man who knows his own business better than the other mand oes. Leslie's Weekly.

## LESSON IN POLITENESS.

A Minneapolis school has lessons in street car courtesy. Chairs are arranged to represent seats in a car and these are occupied by boys. Presently a number of girls, representing women, enter the car, and, of course, the lesson is for the boys to get up and give them the seats. This they do, and thus get the habit, so that in actual life they do not forget their politeness.

Exercises of this kind promote the very best education. It is a sort that, according to the doctrines of this column, train the spirit, and unless this is trained it makes no difference how the mind is developed. Cube-root will never match courtesy in helping one to the higher levels of life. What are the fruits of the spirit we ask again and again? Giving up your seat to a lady on the street car. You may read the Anabasis and Virgil offhand, but if you fail in courtesy your education is only super- and completely derange the whole system when ficial. We will never reach true progress unless this lesson is learned .-- Ohio State Journal

The Vanquishing of Vermicelli. He came from fair Italia land, Of sunny skies and the Black Hand; And let it here be plainly said, He painted every township red.

Shortly after 9 o'clock that morning Asperigo Vermicell drew his gleaming stiletto and began to eat.

The morning was quite dark for 9 o'clock. There was no one to see. There was no sound to hear, only the zip. zip of Vermicelli's stiletto. Zip, zip, and again and again.

At 11 o'clock Asperigo Vermicelli's stiletto could still be seen flashing in the dark morning air.

"Vendetti!" he cried hoarsely. "Vendetti!" Both times hoarsely.

"I shall not be foiled!" hissed Vermicelli. "Carambi! Titta Ruffo! Fortissimo!" It is 1 o'clock in the afternoon. High overhead an

ominous black bird hovered. The overhead sun glinted on the darting stiletto. There

was no moon.

The red sun was busily setting when Vermicelli finally east his stiletto to the ground with a terrible oath.

"Caruso!" he shrieked. "Six o'clock and I haven't gotten this pencil sharpened yet. Vivace!!!" And with another oath almost as terrible, he threw the remaining three-quarters of an inch of his new pencil to the four

# Coffee Drinkers, And Think a Minute

Some persons seem able, for a time at least, to get along with coffee, but it contains a subtle, habit forming drug, caffeine, which sooner or later is pretty sure to rob one of health and comfort.

If you know coffee don't harm y n--- if you feel prime and fit under its continued use, well and good---stick to it. But---if you are sometimes a bit "off color," and irritable nerves, disturbed heart action, biliousness, headache, or symptoms of liver or kidney trouble make

you wonder what's the matter---

Better find out what coffee has to do with it. Evidently some people are learning the truth about coffee—listen—

During 1913 the sales of coffee in this country decreased over one hundred million pounds.

A mighty army of former coffee drinkers now use

and enjoy freedom from the old coffee aches and pains.

Postum, made of whole wheat and a bit of molasses, is a delicious table beverage absolutely free from the coffee drugs, caffeine and tannin.

If you are interested in bettering yourself-think it over.

Postum now comes in two forms. Regular Postum \_must be well boiled. 15c and 25c packages.

Instant Postum\_a soluble powder, requires no boiling. 30c and 50c tins. The cost per cup of both kinds is about the same.
